

Introduction of Chinese Water Enterprises and China Water Enterprises Confederation

2012-9-24

- Water crisis is a global challenge;
- CEWP will benefit both Europe and China.

- Chinese Water Enterprises

There are large number of water enterprises in China , involved in hydropower development, water resources development, saving and protection as well as infrastructure construction.

- more than 2300 enterprises having expertise on construction of hydro project, investigation and design, supervision and consultation;
- more than 2000 enterprises specialised in water supply and sewage treatment;
- over 45000 small and middle-sized power stations;
- about 2600 irrigation & drainage equipment manufacturers;
- over 1300 desalinisation enterprises.

China Water Enterprises Confederation (CWEC)

- Founded in 1995;
- A national industry organization composed of water enterprises and institutions;
- Includes: desalination association, irrigation & drainage equipment association, water machinery association, labor safety and health committee;
- Over 1600 registered members.

Scope of work:

- Investigate and research; policy dissemination; appeal on behalf of members;
- Assist government prepare sector development plans;
- Provide platforms;
- Capacity building for members.

◆ Exchange and cooperation between China and Europe

Organise many entrepreneurs to go to Europe to attend international exhibition, market investigation, technology exchange and study.

Proposals for cooperation

1. CWEC acts as focal point of business dialogue on Chinese side;
2. Regular exchange between Chinese and European private sectors;
3. Promote business cooperation.

Thank you
